From Thursday August 28. to Monday September 1. 1679.

Lisbon Aug. 12.

THE States of this Kingdom are appointed, by the Prince Regent, to meet the 15th of September next, to approve the Marriage between the Infanta and the Duke of Savoy, which, our Letters from *Turin* say, was very much disliked by the generality of People there.

Genova, Aug. 15. Not any Vessels are arrived here this week, except a French Petach from *Thoulon*, to find out the French Gallies which are put into *Porto Vecchio* in *Corsica*, in their way for *Cagliari*, where the Chevalier de *Tourville*, with the French Men of War under his command, attends them, in order to the falling upon 3 Majorjunks of good Force, which he has blocked up in that Port. That *Caxal* will fall into the hands of the French, is now feared more then ever; for we are told from good hands that Monsieur *Gaumont* is negotiating that matter at the Court of *Mantua*, with good hopes of success. From *Turin* we have an account that the Polish Ambassador the Chevalier *Lubomirski*, having obtain'd a promise that the Duke of Savoy will raise and maintain a Regiment of Dragoons for the service of that Crown, in case it enter into a War against the *Turks*, is on his departure from that Court. It is reported that the *Malta* Gallies have had a rencounter with 4 *Turks* Gallies (who, with some other Vessels, had landed in *Calabria*, and made many Slaves there) and had taken some of them. There is a discourse of some disturbance at *Messina*.

Dantzick, Aug. 27. We had some days since a warm report here of a great Victory obtain'd by the *Moscovites* against the *Turks*, but the Letters we have since received from *Poland* prove it to be a mistake; they say that the *Moscovite* Army lay encamped under the Walls of *Kjovia*, expecting the conjunction of more Troops, before they marched towards the Enemy, while in the mean time the Cham of *Tartary* did use all his endeavours to make up a Peace between the *Poles* and the *Turks*, which on the other hand the *Poles* labour all they can to hinder, and the more since the Resident of that Crown at *Constantinople* has, in his late Letters to the King, told him, That the Grand Signior was resolved to break with him, and would, the next Spring, take the Field in Person, to attack him with all the Force of his Empire, and that, to that end, endeavours would be used to prolong the Peace with the Emperor, for 20 years. This advice, as our Letters tell us, was look'd upon to be of such importance, that the King had summoned a Dyet to be held at *Warsaw* the beginning of *December*, and to continue for a Fortnight only.

Vienna, Aug. 20. The Plague encreasing here very much, the Emperor has resolved to remove with his whole Court to *Prague*, for which all

things are accordingly preparing. The Ambassadors of *Poland* and *Moscovy* have received a final Answer to what they came to propose to this Court, which we cannot as yet give you any account of, farther then that the said Ambassadors seem very well satisfied, and are preparing to return home. The advices from *Hungary* are so uncertain, that they deserve not any Credit, and therefore we will not trouble you with them.

Copenhagen, Aug. 26. Yesterday in the evening our King returned hither from *Holstein*. According to the advice we receive this day from *Schenen*, it seems the *Suedes* are going to raise the Siege of *Ellenbourg*; they having already taken the Cannon from their Batteries. Two or three days since, Colonel *Swanwedel*, who went out with a Party from *Landskroon*, meeting with a stronger Party of *Suedes*, was forced to retire with some Loss.

Copenhagen, Aug. 29. The Danish Plenipotentiaries returned the 27th instant again from *Lundun*, to give the King an account of the State the Treaty is in, and to receive his orders upon the the points which remain undetermined. It is believed they will, in a day or two go back to *Lundun*, to try if things may be brought to a conclusion. We have, this evening, advice that 6000 *Suedes*, with 12 pieces of Cannon, are Marched towards *Helmstadt*, with what design it is not known.

Hamburg, Aug. 29. From *Berlin* they write, that the Electoral Prince of *Brandenburg* was the last week privately Married to the Princess of *Hesse Cassel*. The Sieur *Gravemhal* is arrived here from *Sueden*, and as we are informed, has brought that Kings Ratifications of the Treaty concluded some time since by Monsieur *Rabeneat* the French Minister with the Princes of *Lunenbourg*, with a declaration thereupon, which it's believed will be accepted by the said Princes. This day the said Sieur *Rabeneat* parts from hence for *Berlin*, where it's believed he will reside.

Cologne, Aug. 28. The 26 instant the Bishop of *Osnastrug* arrived at *Mulheim*, in his journey to *Eems*; our Magistrates deputed two of their Body to go and Compliment his Highness there, which they performed, and besides made an agreement with him in the matter of the moneys he demanded of this City, by which he contents himself with 15000 Crowns, instead of 20000 which the Emperor had assigned him upon this City, in lieu of Winter Quarters: In pursuance of this accord, 5000 have ben already paid, and the other 10000 are to be, upon demand, at *Francfort*. From *Vienna* they write, that many people dying there daily of the Plague, the Emperor had resolved to remove his Court to *Prague*.

Cologne, Sept. 1. On Tuesday last the Prince and Princess of *Newburg* passed by this City in Barges, down the River and lodged that night at *Mulheim*, where they were complimented on the
